Customers guide to preparing the work-site

Our installers are not responsible for preparing the work-site prior to a room, roof or railing install.

Deck Repair

1. Repair any damage to joist
2. Replace missing and protruding nails and screws with new ones
3. Inspect joists for rotting wood, then repair
4. Secure reinforcing joists
5. Stabilize or replace wobbly post
6. Make sure to check weak post connections and properly fasten ledger board
7. Make sure the deck is level and square
8. Make sure the deck is free from debris

Pre-existing Roof

1. Gently clean your roof, remove dirt and debris
2. Fix damaged or peeled caulking
3. Clean out downspouts and cutters
4. Fix and repair any delaminated areas on the roof

Awnings and Electric Awning

1. Remove the screws from the awning support brackets, braces or arms attached to the building
2. Remove all caulking from the existing building
3. Remove all electrical wires
4. Fill all holes once screws are removed
5. Dispose of all unwanted Awning pieces

Other

Remove any objects that could obstruct the installation of our room, roof or railing.

Lead Hand \$75.00hr, Additional worker \$50.00hr
