## **Customers guide to preparing the work-site**

Our installers are not responsible for preparing the work-site prior to a room, roof or railing install.

### **Deck Repair**

1. Repair any damage to joist
2. Replace missing and protruding nails and screws with new ones
3. Inspect joists for rotting wood, then repair
4. Secure reinforcing joists
5. Stabilize or replace wobbly post
6. Make sure the deck is level and square
7. Make sure the deck is free from debris

### **Pre-existing Roof**

1. Gently clean your roof, remove dirt and debris
2. Fix damaged or peeled caulking
3. Clean out downspouts and cutters
4. Fix and repair any delaminated areas on the roof

### **Awnings and Electric Awning**

1. Remove the screws from the awning support brackets, braces or arms attached to the building
2. Remove all caulking from the existing building
3. Remove all electrical wires
4. Fill all holes once screws are removed
5. Dispose of all unwanted Awning pieces

### **Other**

Remove any objects that could obstruct the installation of our room, roof or railing. ie: trees, tree stubs

Additional charges will apply should our installers have to repair the site prior to installation.

Thank-you for your business
